SUMMARY

Founder and product engineer building AI-powered product experiences end-to-end, from product direction and full-stack execution to automation workflows and user feedback loops. Background includes 5-6 months of business analyst internship experience across requirements, validation documentation, UAT support, and client operations.

SKILLS

Engineering: React Native, Expo, TypeScript, JavaScript, Python, full-stack web development, REST APIs

AI & Automation: Claude API, LLM workflows, n8n automation, AI agents, chatbot integrations

Tools & Platforms: Supabase, Postgres, Git, Vercel, MySQL, Power BI, Tableau

EXPERIENCE

Relent Mar 2026 - Present

Founder & Product Engineer

- Building and shipping a cross-platform mobile wellness app in React Native / Expo centered on a 45-second emotional check-in flow, results cards, and a CBT/ACT/somatic exercise library.
- Architected the stack end-to-end with Supabase, authentication, Claude API integration for AI features, Expo push notifications, and Vercel hosting.
- Built deterministic personalization that generates session-specific copy without extra API calls, improving speed and consistency.
- Running an early closed Android beta and iterating from direct tester feedback on activation, check-in flow, and retention.

Ample Logic Dec 2025 - Feb 2026

Business Analyst Intern

- Supported production issue tracking for 6+ clients, helping maintain uptime and service standards.
- Translated client requirements into developer-ready specifications and bridged business stakeholders with technical teams.
- Created and executed validation documentation including FRS, OQ, and UAT support material.

The TriTech Aug 2025 - Nov 2025

Automation & Business Analyst Intern

- Engineered and deployed an AI agent for resume-data processing with intelligent extraction and database integration.
- Developed full-stack applications and integrated chatbots to embed automated pipelines into live websites.
- Built n8n workflows to streamline operations, reduce manual data handling, and support daily attendance dashboards.

PROJECTS

- **AI Resume Processing Agent:** Automated resume extraction, structuring, and database integration using AI and workflow automation.
- **Chatbot-Enabled Web Experiences:** Embedded chatbot interfaces and automated pipelines into live websites for faster data access and user workflows.
- **Relent Product System:** Built product flows, automation, and AI-assisted personalization across a mobile wellness experience.

EDUCATION

B.Tech, Gokaraju Rangaraju Institute of Engineering and Technology | GPA 7.54/10 | 2021 - 2025

Intermediate (MPC), Excellencia Junior College | 77.6% | 2019 - 2021

Secondary (SSC), Birla OpenMinds | 75%

LEADERSHIP & ACTIVITIES

Sponsorship & Logistics Lead, GRIET SDC • Vice President, Photography Club • Sponsorship & Events, Rhythms fest

Languages: English, Telugu, Hindi
